The Joint Assessment Centre (NEJAC) is located on the Main Promenade next to the Gift Shop. Patients requiring hip and/or knee replacements are referred through their family physician, nurse practitioner, walk in clinic, or ER department for an appointment with the Advanced Practice Physiotherapist. A thorough assessment is done to determine if the patient requires surgery. The NEJAC will support the patient's choice for a referral to the local Orthopedic Surgeon, or the Surgeon of their choice in the North East Local Health Integration Network (NE LHIN), or the first available surgeon in the NE LHIN. In addition, the centre offers a conservative treatment plan to help manage symptoms while patients are waiting for joint replacement surgery.

Ontario Telemedicine Network

Timmins is a member of Ontario Telemedicine Network, a program that offers access for rural and remote communities to Specialist Services using interactive television. The basic tele-video stations are augmented with accessories for conducting heart, chest skin, and other assessments. Ontario Telemedicine Network has studios in all Hospitals, CCAC's, LHIN's, Public Health Units in Ontario.

There are 1700 sites so far and 3200 systems (cameras). Many of the sites have multiple systems. Most specialties lend themselves well to this type of technology. Patients are referred by their family doctor for initial and follow-up medical appointments.

The Ontario Telemedicine Network makes all the arrangements and communicates them to the patients and specialists.

Many people prefer to receive their health care via Ontario Telemedicine Network rather than travel long distances.

Ask your doctor if your appointment can be via tele-video. Inquiries can be made by calling 1-888-346-6784. Visit the website for more information www.otn.ca

You may feel the need to contact pastoral care if you are experiencing grief, loss of hope, or lack of support. The chapel is open to patients, staff and families 24 hours/day. Chaplaincy services provide a caring presence to patients, family, and friends in a crisis or emergency situation. Patient Drop Off

Clients are permitted to pick up and drop off clients/patients at the front entrance of the Hospital. Drivers must remain in view of their vehicle.

Patient Safety - Partners in Care

The Timmins and District Hospital cares about your safety when you access any of our services.

We believe in safe, quality services but we need your help. One way to do this is by being SAFE.

Speak up if things don't seem right or if you have questions or concerns. Pay attention to the care you are getting. Make sure you are getting the correct treatments and medications from the correct healthcare professionals. You are the expert on you.

Ask questions. If you don't understand information given, ask again. You have the right to ask questions and get answers you can understand. Participate in all decisions about your care. Asking questions helps you to learn as much as you can about your condition, treatment plan, any planned tests, and about your choices so that you can make the best decisions.

Family or friends, with your permission, can come with you to the Hospital for support or to ask questions on your behalf when you are not feeling well. Let your health care team know who this person is.

Educate yourself about your condition, what your treatment plan is and what you can do to improve your health. The more you know, the better you are at preventing mistakes and taking care of yourself. Know what medications you are on, why you take them and keep an updated list with you.

Three Big Risks to Safety

Studies have shown that three of the most common risks for patients are infections, falls, and medicines.

The following tips outline some of the ways that you can help lower your risk while you are in hospital:

Infections

Hospital associated infections are one of the most common types of adverse events occurring in hospitalized patients. Here are some simple things that you can do to reduce your risk:

- To help prevent the spread of infections, wash your hands often using soap and water or hand sanitizer.
- When you visit the Hospital or any healthcare facility it is very important that you wash your hands.
- If you are being seen by a healthcare provider, ask them to wash their hands before examining you.
- If you are visiting a patient in isolation, follow the directions on the sign posted on the door and wear the protective equipment provided.

Falls

- Make sure you can reach the call bell if you are in bed, a chair, or the bathroom so that you can ring for help.
- Make sure you **ASK FOR HELP** if you need it to use the bathroom or sit/stand.
- Wear slippers/shoes with non-skid soles that fit well.
- Keep your room free from clutter. Be aware of tripping hazards such as cords, or newspapers on the floor.
- Some medicines can make you dizzy or sleepy. Know how your medicines affect you - ask your healthcare provider.
- If you require equipment to help you, such as a wheelchair or walker, it should be in good working order. If you have any concerns ask your physiotherapist and/or occupational therapist.

Medicines

- Know what medicines (name, strength, and how often) you are on and why (even any non-prescription medicines like Tylenol, vitamins or herbals).
- Make sure your health care provider identifies you correctly before giving you any medicine
- Ask what the medicine is that you are being given and what it is used for each time
- Ask questions if the medicine looks different than what you were taking at home or from what they have been giving you in hospital
- Ask for a list of all the medications you are supposed to be on at discharge

Patient Satisfaction Survey

We conduct internal surveys with you before you are discharged; however, you may instead receive a patient satisfaction survey in the mail after you leave the Hospital (for E.R and Mental Health Unit). Your opinion is important to us as we are continually trying to improve services for patients and families. We ask that if you do receive a survey, that you take the time to share your comments and feedback with us. You can also complete a satisfaction survey on our website at www.tadh.com

Quality Improvement

Quality at Timmins and District Hospital means doing the right thing, at the right time, for the right person and producing the best possible result. Our Quality Improvement Plan, or QIP, is one tool that we are using to help us document and review our current performance in a variety of areas. With this plan, we will be able to very clearly see our targeted areas for improvement and chart our progress.

QIPs contain a number of indicators and targets for improvement. QIPs must also outline how those targets will be achieved, and the results will be reported publicly. The QIP will help Timmins and District Hospital achieve continuous quality improvement and is available on the TADH website.

Rehabilitation Services

Our rehabilitation services are provided by physiotherapists, occupational therapists, kinesiologists and a speech language therapist. Services are provided to both inpatients and outpatients.

Scent Reduction Policy

Smoking Policy

Smoking is not permitted anywhere on the Hospital property including parking lots and in personal vehicles. All patients, visitors, staff, physicians and volunteers are required to leave Hospital property entirely if they wish to smoke. The Timmins and District Hospital implemented this program to eliminate the hazardous impacts of smoking for those who work, visit and stay at the Hospital, while simultaneously staying committed to providing high-quality healthcare services.
